Vitals

Blood Pressure	Pulse	Temperature	SpO2	Weight	Height
124 / 80 mmHg	78 bpm	37.8 °C	97 %	74 kg	178 cm

Symptoms & Diagnosis

Chief complaints: Sore throat, dry cough and mild fever for 3 days; fatigue.

Diagnosis: Acute viral pharyngitis (upper respiratory tract infection). No signs of bacterial infection.

Prescription

#	Medicine	Dosage	Frequency	Duration	Instructions
1	Paracetamol 500 mg	1 tablet	Every 6-8 hours if fever > 38 °C	5 days	After food, max 4 tablets/day
2	Cetirizine 10 mg	1 tablet	Once daily at night	5 days	May cause drowsiness
3	Benzydamine throat lozenges	1 lozenge	Every 4 hours as needed	5 days	Do not exceed 6/day
4	Saline nasal spray	2 sprays/nostril	3 times daily	7 days	—

Advice

- Rest, warm fluids (2-3 L/day) and salt-water gargles 3 times a day.
- Avoid cold drinks, smoking and dusty environments.
- Follow-up consultation on StayHealthy in 5 days, or earlier if fever exceeds 39 °C, breathing becomes difficult or symptoms last beyond 7 days.
